

Autism & Related Disorders Certificate

Get certified by a U.S. Specialist - 100% online!

Learn about Autism Spectrum Disorder and learn professional tools and strategies from doctoral-level consultants.

Odysia Learning offers a **comprehensive course in ASD** that is divided into four, eight-week modules. Students will learn **practical tools** and **strategies** to deal with children with **Autism Spectrum** and other related disorders. Upon completion of all modules and fieldwork, students earn a **certificate of completion** demonstrating **preparedness to work** with individuals who have been diagnosed with autism.

Students Will Explore:

- Different ways to Define Autism
- Current Prevalence of Autism
- How Autism is Diagnosed
- Core Features of Autism
- Related Disorders
- Types of Interventions
- Behavioral Intervention Techniques
- Other Supportive Strategies
- Case Studies
- Supervised Field Work
- Other Supportive Strategies such as Sensory Integration and more

Course Requirements:

Computer, mic, email, and internet access

About the Instructor:

Dr. Shaana Berman is an accomplished **early childhood development specialist** and **educational consultant** in the Los Angeles area. Since 1998, Dr. Berman has worked in both **private** and **public settings** to teach academic skills, **reduce** maladaptive behaviors, and **increase** functional and social skills among a variety of populations including but not limited to: students with autism spectrum disorders, ADHD, cognitive delays, genetic syndromes, processing disorders and physical disabilities. Her philosophy is that **all children can learn**, given the right type of supportive instruction.
